WHO GETS TARGETED

They don’t call at random

Police call people over 60 “ideal victims”.

Scammers search phone books for old-fashioned names and short landline numbers.

They fake the caller ID, even **110**.

Past victims get called again.

PHONE BOOK · WHAT THEY LOOK FOR

Müller, Hildegard	23 14 5
Neumann, Lukas	0176 4429 1180
Schmidt, Herta	48 81 2
Yilmaz, Emre	0152 7731 0094
Becker, Wilhelm	51 20 7

Illustration. Names and numbers invented.

THE SOLUTION

Meet Ellie

01

Prevent

Opens every call with “This call is protected by Ellie.”

02

Detect

Live transcript, caller number and first contact give a scam score from 0 to 100.

03

Intercept

At 80, warns her privately, texts her family and ends the call.

04

Advise

Says what to do next, and answers “Was that real?” after the call.

05

Report

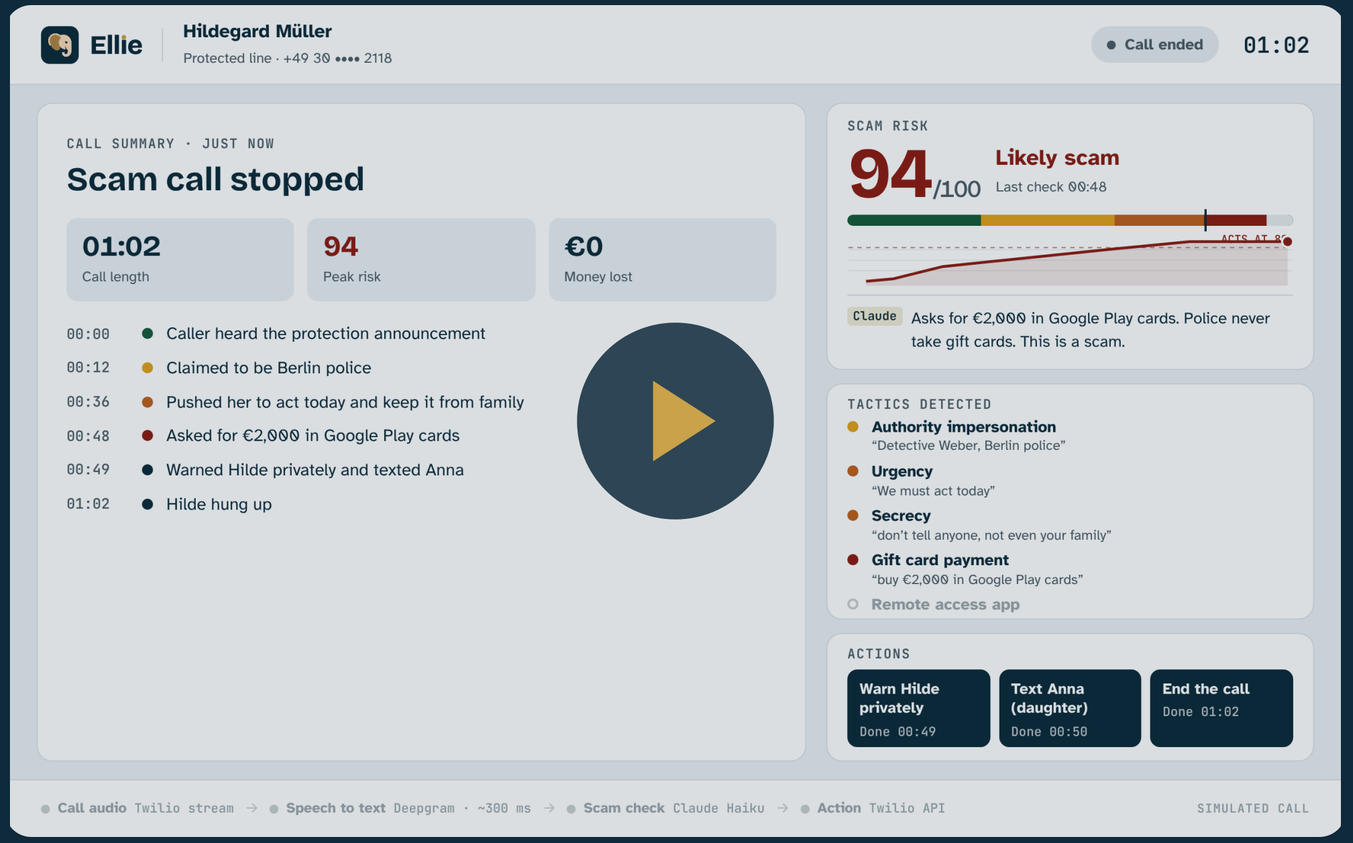

Writes the report for the police or the bank. Her family just checks and sends it.

DEMO · 1:24

Watch Ellie stop a fake police call

“Detective Weber” calls Hildegard Müller, 78. Watch the score rise, and watch Ellie step in at 80.

Play the demo video

BUILT ON THE TACTICS POLICE WARN ABOUT

Ellie knows the scammer’s playbook

Authority
“This is the police, your bank, the tax office”

Urgency
“We must act today, before the bank closes”

Secrecy
“Don’t tell anyone, not even your family”

Threat
Arrest, fines, a frozen account

Emotion
“Your grandson had an accident”

Isolation
“Stay on the line, don’t hang up”

Payment
Safe account, cash pickup, gift cards, crypto

Codes
PIN, TAN, one-time code, card details

Remote access
“Install AnyDesk so I can help you”

Payment, codes or remote access + authority or secrecy = 80+. Ellie acts.

HOW CLAUDE IS USED

AI on her side

Claude Haiku listens live

Reads the transcript as the call runs and returns a scam score, the tactics it sees with quoted evidence, and a one-line warning.

Rules run alongside

A rules layer scores every line too, so protection never depends on a single API call.

Claude Sonnet writes it up

The text to the family and the report for the police, in plain language.

A companion to ask

After the call, she can ask Ellie “Was that real?” and get a calm, clear answer.

AFTER THE CALL

From call to report in one tap

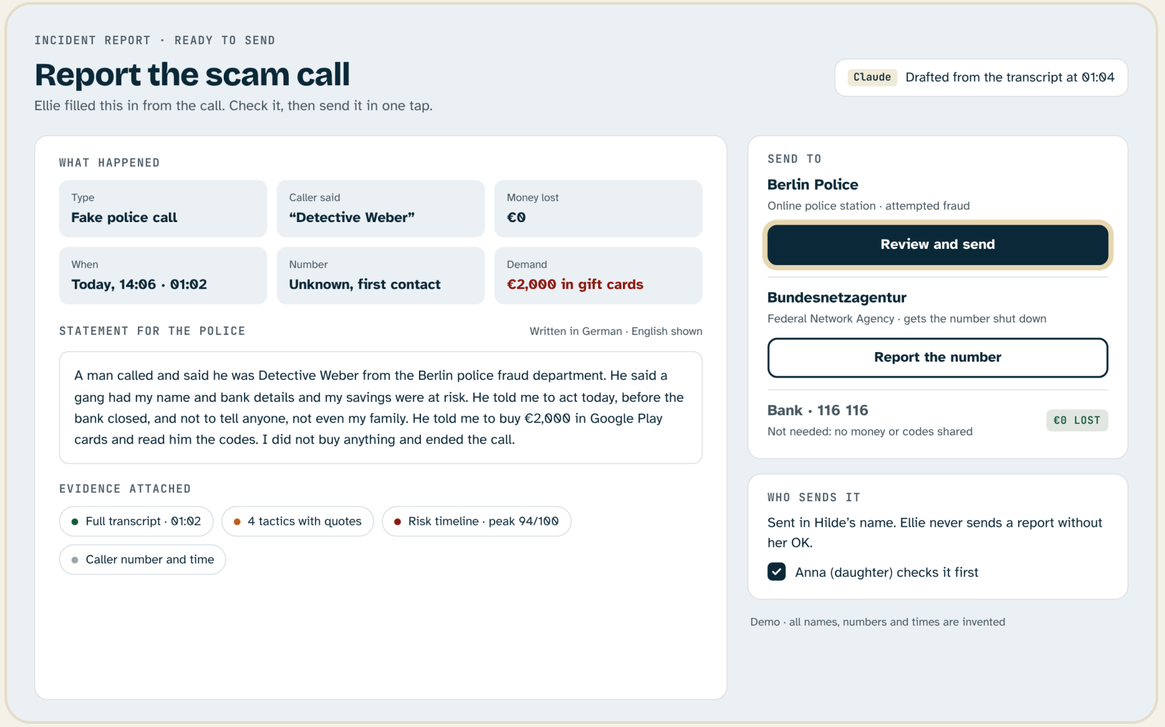

01 Scam call stopped: **€0 lost**

02 Ellie drafts the report: what happened, the transcript, quoted evidence

03 Picks the right place: police online, Bundesnetzagentur, bank

04 She or her family checks it and sends it

Only 41% of victims report today. Ellie makes it one tap.
